Xlib Compose Key Charts

Table of Contents

Xlib Compose Keys for am_ET.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the am_ET.UTF-8 compose table.

UTF-8 (Unicode) compose sequence for Ethiopean layout. Designed as a part of OLPC project 2007 Sergey Udaltsov <svu@gnome.org> Group I Modifier: /u/

Table 1. Compose Key Sequences for am_ET.UTF-8

Key Sequence	Action

Xlib Compose Keys for armscii-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the armscii-8 compose table.

ARMSCII-8 Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for C

Applications using Xlib input handling should recognize these compose key sequences in locales using the C compose table.

This compose table defines no sequences of its own.

Xlib Compose Keys for cs_CZ.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the cs_CZ.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

UTF-8 (Unicode) compose sequences Modified for Czech, following iso8859-2/Compose by James Cloos <cloos@jhcloos.com> based on bug report by Vladimír Marek <vlmarek@volny.cz> Use the sequences from en_US.UTF-8 as the basis:

Table 2. Compose Key Sequences for cs_CZ.UTF-8

Key Sequence	Action
Overriding U with caron:	
dead_caron u	"ů" U016F # LATIN SMALL LETTER U WITH RING ABOVE
dead_caron U	"Ů" U016E # LATIN CAPITAL LETTER U WITH RING ABOVE

Xlib Compose Keys for el_GR.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the el_GR.UTF-8 compose table.

UTF-8 compose sequence definitions for the greek keyboard layout. This file is mostly meant to be used along with the xkb/symbols/el symbols definition file. In addition, the dead key definitions in the machine generated part are really only relevant to the "polytonic" variant in that file. The definitions herein cover the following ISO 10646 / Unicode ranges: - Basic Latin (0000-007F) (complete coverage) - Latin-1 Supplement (0080-00FF) (complete coverage) - Greek and Coptic (0370-03FF) (only the big ISO 8859-7 based part at the beginning) - Greek Extended (1F00-1FFF) (complete coverage) - There are also six (6) characters from other ranges. Moreover, the following character sets are completely covered: - ISO 8859-1 - ISO 8859-7 This file consists of four parts. Two of them have been adapted from the iso8859-1/Compose and iso8859-7/Compose files. The other two parts have been created by: Vasilis Vasaitis <vvas@hal.csd.auth.gr> based on the idea and initial implementation by: Alejandros Diamandidis <adia@egnatia.ee.auth.gr> Part 1 ISO 8859-1 (Latin-1) multi-key definitions extracted and converted from the iso8859-1/Compose file. Special Character

Xlib Compose Keys for en_US.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the en_US.UTF-8 compose table.

APL support Geoff Streeter 2012-01-04 APL was initially an overstruck language. The original APL terminal was an IBM golfball with a specially designed golfball. This meant that characters could be overstruck to produce other characters. This gave APL a richness of primitives which is still powerful today. Overstrikes were always independent of order. APLs have extended this into a number of dialects. Let us try to support lots of them. Together with some that have not been used yet. Some traditional ones are not included. Xlib Compose Keys for fi_FI.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the fi_FI.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

Official compose sequences for Finland based on SFS 5966:2019 standard This compose sequence map implements all the functionality of Annex 3 and Annex 4 of the standard and additionally defines the sequences provided in en_US.UTF-8/ Compose. SFS 5966 sequences override any conflicting rules from en_US.UTF-8/ Compose. Annex 1 of the standard is implemented in the keymap symbols/fi Complete rewrite by Marko Myllynen Original version by Troy Korjuslommi Use en_US.UTF-8/Compose as the base compose sequence definition set

Table 14. Compose Key Sequences for fi_FI.UTF-8

Key Sequence	Action
Define all the sequences of the standard overriding any sequence from en_US.UTF-8/Compose if such a sequence was provided already Sequences from Annex 3 Sequences with COMBINING ACUTE ACCENT / <dead_acute>

Xlib Compose Keys for georgian-academy

Applications using Xlib input handling should recognize these compose key sequences in locales using the georgian-academy compose table.

georgian-academy Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the

appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for georgian-ps

Applications using Xlib input handling should recognize these compose key sequences in locales using the georgian-ps compose table.

georgian-ps Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for ibm-cp1133

Applications using Xlib input handling should recognize these compose key sequences in locales using the ibm-cp1133 compose table.

ibm-cp1133 Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for iscii-dev

Applications using Xlib input handling should recognize these compose key sequences in locales using the iscii-dev compose table.

This compose table defines no sequences of its own.

Xlib Compose Keys for isiri-3342

Applications using Xlib input handling should recognize these compose key sequences in locales using the isiri-3342 compose table.

This compose table defines no sequences of its own.

Xlib Compose Keys for iso8859-1

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-1 compose table.

ISO 8859-1 (Latin1) Compose Sequence Sequence Definition <Multi_key> Means <Compose> Special Character

Table 15. Compose Key Sequences for iso8859-1

End of Sequence Definition	

Xlib Compose Keys for iso8859-10

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-10 compose table.

ISO 8859-10 Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for iso8859-11

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-11 compose table.

This compose table defines no sequences of its own.

Xlib Compose Keys for iso8859-13

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-13 compose table.

ISO 8859-13 (Latin7) Compose Sequence Sequence Definition <Multi_key> Means <Compose> Special Character Right-hand side (Accented Alphabet) These compose sequences are pure supposition on my part. It would be nice to know what the real cultural conventions are for compose sequences.

Xlib Compose Keys for iso8859-14

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-14 compose table.

ISO 8859-14 (Latin 8) Compose Sequences Original version by Alastair McKinstry, <amck@maths.tcd.ie> Fixed and tidied up by Seamus O Ciardhuain <seoc@cnds.ucd.ie> (Dec 2002) First part is taken from the Latin-1 definitions,

i.e. characters the same in 8859-1 and 8859-14. <Multi_key> Means <Compose>
Special Character

Table 17. Compose Key Sequences for iso8859-14

End of Sequence Definition	

Xlib Compose Keys for iso8859-15

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-15 compose table.

ISO 8859-15 (Latin1) Compose Sequence Sequence Definition <Multi_key> Means <Compose> Special Character

Table 18. Compose Key Sequences for iso8859-15

End of Sequence Definition	

Xlib Compose Keys for iso8859-2

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-2 compose table.

ISO 8859-2 (Latin2) Compose Sequence Sequence Definition <Multi_key> Means <Compose> Special Character

Table 19. Compose Key Sequences for iso8859-2

Key Sequence	Action

End of Sequence Definition	

Xlib Compose Keys for iso8859-4

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-4 compose table.

ISO 8859-4 (Latin4) Compose Sequence Sequence Definition <Multi_key> Means <Compose> Special Character Right-hand side (Accented Alphabet) These compose sequences are pure supposition on my part. It would be nice to know what the real cultural conventions are for compose sequences.

Table 21. Compose Key Sequences for iso8859-4

Key Sequence	Action
Multi_key A comma	"¡" Aogonek

Key Sequence	Action
Multi_key comma A	"¡" Aogonek
Multi_key k k	"¢" kra
Multi_key R comma	"£" Rcedilla

Xlib Compose Keys for iso8859-5

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-5 compose table.

ISO 8859-5 Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for iso8859-6

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-6 compose table.

ISO 8859-6 Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for iso8859-7

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-7 compose table.

ISO 8859-7 (Greek) Compose Sequence Sequence Definition <Multi_key> Means <Compose> Special Character

Xlib Compose Keys for iso8859-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-8 compose table.

ISO 8859-8 Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for iso8859-9

Applications using Xlib input handling should recognize these compose key sequences in locales using the iso8859-9 compose table.

ISO 8859-9 (Latin5) Compose Sequence Sequence Definition <Multi_key> Means <Compose> Special Character

Xlib Compose Keys for ja

Applications using Xlib input handling should recognize these compose key sequences in locales using the ja compose table.

ja Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for ja.JIS

Applications using Xlib input handling should recognize these compose key sequences in locales using the ja.JIS compose table.

ja.JIS Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for ja_JP.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the ja_JP.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

This compose table defines no sequences of its own.

Xlib Compose Keys for ja.SJIS

Applications using Xlib input handling should recognize these compose key sequences in locales using the ja.SJIS compose table.

ja.SJIS Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for km_KH.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the km_KH.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

Xlib Compose Keys for koi8-r

Applications using Xlib input handling should recognize these compose key sequences in locales using the koi8-r compose table.

koi8-r Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for koi8-u

Applications using Xlib input handling should recognize these compose key sequences in locales using the koi8-u compose table.

koi8-u Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for ko_KR.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the ko_KR.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/ X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

This compose table defines no sequences of its own.

Xlib Compose Keys for microsoft-cp1251

Applications using Xlib input handling should recognize these compose key sequences in locales using the microsoft-cp1251 compose table.

This compose table defines no sequences of its own.

Xlib Compose Keys for microsoft-cp1255

Applications using Xlib input handling should recognize these compose key sequences in locales using the microsoft-cp1255 compose table.

This compose table defines no sequences of its own.

Xlib Compose Keys for microsoft-cp1256

Applications using Xlib input handling should recognize these compose key sequences in locales using the microsoft-cp1256 compose table.

This compose table defines no sequences of its own.

Xlib Compose Keys for mulelao-1

Applications using Xlib input handling should recognize these compose key sequences in locales using the mulelao-1 compose table.

mulelao-1 Compose Sequence Sequence Definition This file currently has no entries. It appears that a compose file (even just an empty one) is required for the appropriate keysyms to work for this encoding. <Multi_key> Means <Compose> Special Character End of Sequence Definition

This compose table defines no sequences of its own.

Xlib Compose Keys for nokhchi-1

Applications using Xlib input handling should recognize these compose key sequences in locales using the nokhchi-1 compose table.

This compose table defines no sequences of its own.

Xlib Compose Keys for pt_BR.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the pt_BR.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

UTF-8 (Unicode) compose sequences Originally modified for Brazilian Portuguese by Gustavo Noronha Silva <kov@debian.org>. Transformed to an include file plus some overrides by Benno Schulenberg <bensberg@justemail.net> Use the sequences from en_US.UTF-8 as the basis:

Table 27. Compose Key Sequences for pt_BR.UTF-8

Key Sequence	Action
This one should probably be deleted, because in en_US.UTF8 this is lowercase schwa, not uppercase:	
Multi_key e e	"Ə" U018f
Two nice additions -- maybe add to en_US.UTF8?	
Multi_key quotedbl backslash	" ̏ " U301d # REVERSED DOUBLE PRIME QUOTATION MARK
Multi_key quotedbl slash	" ̋ " U301e # DOUBLE PRIME QUOTATION MARK
Overriding C with acute:	
dead_acute C	"Ç" Ccedilla # LATIN CAPITAL LETTER C WITH CEDILLA
dead_acute c	"ç" ccedilla # LATIN SMALL LETTER C WITH CEDILLA
Overriding E with ogonek:	
Multi_key comma E	"Ȩ" U0228 # LATIN CAPITAL LETTER E WITH CEDILLA
Multi_key comma e	"ȩ" U0229 # LATIN SMALL LETTER E WITH CEDILLA
Overriding U with ogonek:	
Multi_key U comma E	"Ḝ" U1E1C # LATIN CAPITAL LETTER E WITH CEDILLA AND BREVE
Multi_key U comma e	"ḝ" U1E1D # LATIN SMALL LETTER E WITH CEDILLA AND BREVE

Key Sequence	Action
These two should probably go back into en_US.UTF8; they were most likely mistakenly dropped in June 2006:	
Multi_key acute U03D2	"ϓ" U03D3 # GREEK UPSILON WITH ACUTE AND HOOK SYMBOL
Multi_key apostrophe U03D2	"ϓ" U03D3 # GREEK UPSILON WITH ACUTE AND HOOK SYMBOL

Xlib Compose Keys for pt_PT.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the pt_PT.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

Table 28. Compose Key Sequences for pt_PT.UTF-8

Key Sequence	Action
dead_acute C	"Ç" Ccedilla # LATIN CAPITAL LETTER C WITH CEDILLA
dead_acute c	"ç" ccedilla # LATIN SMALL LETTER C WITH CEDILLA

Xlib Compose Keys for ru_RU.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the ru_RU.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

This compose table defines no sequences of its own.

Xlib Compose Keys for sr_RS.UTF-8

Applications using Xlib input handling should recognize these compose key sequences in locales using the sr_RS.UTF-8 compose table.

This compose table includes the non-conflicting entries from: /usr/X11R7/share/X11/locale/en_US.UTF-8/Compose. Those entries are not shown here - see those charts for the included key sequences.

Serbian accentable Cyrillic letters: a A - U+0430, U+0410 Cyrillic_a, Cyrillic_A e E - U+0435, U+0415 Cyrillic_e, Cyrillic_E o O - U+043E, U+041E Cyrillic_o, Cyrillic_O у У - U+0443, U+0423 Cyrillic_u, Cyrillic_U и И - U+0438, U+0418 Cyrillic_i, Cyrillic_I Possible accents:̀ - U+0300 combining gravè́ - U+0301 combining acutê̂ - U+0302 combining circumflex̏ - U+030F combining doublegravè - kratkouzlazni, U+0300 combining grave
